EDUCATION

SRM University AP, Andhra Pradesh Aug 2024 – May 2028

B.Tech in Computer Science & Engineering | CGPA: 7.94/10 (Till 4th Semester)

EXPERIENCE

Summer Research Intern June 2026 – Present

SRM University AP

- Developing a Dijkstra-based path planning algorithm for autonomous mobile robots in Webots.
- Integrating GPS and Compass sensors for robot localization and navigation.
- Simulating robot movement in structured environments using Webots.
- Developing and testing path-following behavior for autonomous navigation.

PROJECTS

RH-Dijkstra: Risk-Aware Path Planning in Webots GitHub

- Developed a Dijkstra-based path planning system for autonomous mobile robot navigation.
- Integrated GPS and Compass sensors for localization and waypoint navigation.

Garbage Collection Tracker & Smart Reminder System GitHub

- Built a Flask-based waste management system with real-time scheduling and reminders.
- Implemented automated notifications and dashboard-based tracking.

CityExplorer (MERN Stack) GitHub

- Developed a MERN-based city exploration platform with JWT authentication.
- Built REST APIs and MongoDB integration.

Exam Management System GitHub

- Designed a normalized MySQL schema up to 3NF.
- Implemented SQL joins, views, and ER diagrams.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL | **Frameworks:** React.js, Node.js, Express.js, Flask, MongoDB, MySQL

Tools: Git, GitHub, VS Code, Webots | **Core:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Full Stack Development, Robot Motion Planning

CERTIFICATIONS

- MongoDB Associate Developer
- CRUD Operations in MongoDB
- Explore Machine Learning using Python
- Prompt Engineering with ChatGPT
- Ethics in the Age of Generative AI
